Profile

Profile: Financial trader specialized on derivatives, uses his own customized trading platforms; technical financial advisor and wealth planner; business and strategy consultant.

Career History

2010 – Today

Trader and Technical Financial Advisor. Rome - Italy

On 2010 he started working on financial trading approaching the markets by technical analysis. He attended many courses on advanced technical analysis, options and forex trading, wealth and financial planning methodology.

He developed and coded technical analysis indicator for:

- stock picking to apply on investment strategies (Europe and USA markets)
- trading on derivatives

He customizes trading platforms that uses on the activities he is focused on:

- wealth and financial advisory, for investment and financial products analysis (including OICR and ETF)
- intraday trading on futures market

Collaborates as financial advisor with OAdvisory consultancy firm.

March 2003 – June 2010

Value Team, Manager. Rome – Italy

Professional experience in management consulting projects focused on business strategy and processes review and on information technology.

Responsible for the systems implementation, operation and reporting of strategic control and performance management.

He is involved on projects aimed to review internal business processes on pre- and post- sales activities for company resources and services to final customers and supports client to define the Information strategy plan to streamline costs and improve operational efficiency.

Supports Customer Operations to define and develop self-caring contents and processes applied to Consumer and Business customers.

He supports clients to implement many projects, starting from feasibility study to their release, in order to realize integration/synergy of Business Units within IT department.

Involved as expert on systems architecture he supports client to define an "Enterprise Architecture framework" (i.e. guide lines, internal standards, platforms and technologies) used to design and implement new telco services and to implement enterprise infrastructure together with business processes to provide and bill telco products/services to final customers.

September 1999 – March 2003

Andersen consulting (today Accenture), Consultant. Rome - Italy, Madrid – Spain, Sophia Antipolis – France, Berlin - Germany.

Professional experience in consulting firm focused mainly on information technology.

Supports clients, in Italy, Belgium and Germany, to develop a mediation system for the accounting of next-generation telco services and to provide content billing for post- and pre-paid customers (rating / billing real time)

He supports the feasibility study for the introduction of Customer Care (Siebel) and Billing (Arbor/BP) platforms within telco companies in Italy for corporate customers. Then he becomes responsible for deployment and operation of Post Billing System within the chain CRM-ERP-Billing systems architecture to manage corporate customers in Italy and Spain.

Education

May 1999 Bachelor of **Electronic Engineering** (Telecommunications area), Università degli Studi di Salerno. Cattedra di Comunicazioni Elettriche (Prof. M. Longo) – **Valuation: 110/110**.
